

4 Stats that Support the Rise of the Mobile POS System

Technology is made to expedite transactions. The mPOS is more than just a sleeker, redefined processing system. It's an integral conduit to the efficiency of a business and a surefire way to ensure a convenience store retains its competitive edge. The global mPOS terminal market size surpassed \$25 billion USD in 2022 and is expected to register a 10% CAGR from 2023 to 2032. Don't get left behind. This market is only going to surge, and the future of business depends on it...

mPOS Terminals Are Growing:

+15% market gains from now through 2032.

Consumers Abandon Lines:

85%

of consumers leave if they wait over 5 minutes

First Impressions Are Key:

54%

of shoppers don't return after a bad experience

Convenience stores appeal to the now:

40-80% of all purchases are impulsive
